HEY TIGER

DESIGN & LAYOUT SPECIFICATION

The artwork-placement guide for the graphic designer. Every page's measurements, logo positions, icon & sticker placements, brand colours, type and the safe zones where you can drop new artwork — for the landing page and every other page.

PREPARED FOR

Graphic Design / Artwork

PRODUCT

heytigerdubai.com — Web

VERSION

v1.0 · 2026-06-02

VENUE

Brass Monkey Hospitality

HOW TO READ THIS

The site is built fluid & responsive — it reshapes itself between phone and desktop. Sizes below are written as min → max. Read this first; it makes every later page make sense.

Fluid sizes — clamp(min, ideal, max)

Almost nothing on this site is a single fixed number. A value like `clamp(24px, 5vw, 72px)` means: never smaller than **24px** (phone), scales with screen width, never larger than **72px** (large desktop).

- Design the **desktop** artboard at the **MAX** value.
- Design the **mobile** artboard at the **MIN** value.
- `vw` = 1% of screen width · `dvh` = 1% of screen height.

How the wireframes work

- **RED PILL** = a hard measurement (px / mm).
- **RED ZONE** = an **editable area** — where you can place / swap artwork.
- **LOGO** = fixed logo position.
- Numbered **1** dots map to the notes beside each diagram.

CONTENTS

PG	SECTION	WHAT'S INSIDE
03	Canvas & breakpoints	Artboard sizes to design at, and where the layout reflows
04	Colour system	Every brand hex, its role and where it's allowed
05	Typography	Fonts, what each is used for, the full size scale
06	Spacing, grid & motion	Padding tokens, max widths, easing & timings
07	Logo — files & placement map	The 2 logos, 3 treatments, and all 8 places they appear
08	Stickers, icons & buttons	Decal inventory, UI icons, the button system
09	Landing page — full stack	All 11 sections top-to-bottom with heights
10–14	Landing — section details	Nav · Hero · About · Story · Menu · Bands · Form · Spaces · Footer
15	Menu page (/menu)	Header, sticky nav, dish grid, QR
16	Availability page (/availability)	Header, hours table, CTA
17	Editable zones & asset checklist	Everywhere you can drop artwork + export specs

CANVAS & BREAKPOINTS

Design at these four artboard widths. Page background & photography bleed edge-to-edge; **text content stays inside a 1360px max-width** and is centred on big screens.

RECOMMENDED ARTBOARDS

Desktop 1440 × 900 px The main design target. Content column maxes at 1360px; hero text column maxes at 1100px. Background photos fill the full width.	Large desktop 1920 × 1080 px Only backgrounds / panorama stretch wider. Text + UI stay centred at ≤1360px, so margins grow on the sides.
Tablet 834 × 1112 px Most 2-column splits have collapsed or are about to. Good checkpoint for the 900px & 768px reflows.	Mobile 390 × 844 px iPhone 14/15 class. Everything is single-column; the nav becomes a hamburger; a floating Book a table pill sits bottom-centre.

REFLOW BREAKPOINTS — WHERE THE LAYOUT CHANGES

MAX WIDTH	WHAT CHANGES
980px	Top-nav links + desktop CTA hide → hamburger menu appears (full-screen overlay).
900px	Footer, menu grid, "Form Meets Function" & Spaces title row all collapse to 1 column ; menu grid → 2 columns.
860px	About section stops being a 58/42 split and stacks (text over photo).
768px	Spaces showcase → 1 column; the bottom photo strip → 3 columns.
600px	Story triptych stops being side-by-side and stacks vertically.
560px	Menu category grid → 1 column .
480px	Spaces photo strip → 2 columns.

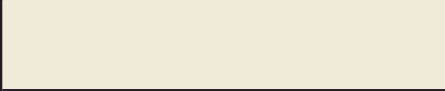

FIXED NUMBERS THAT NEVER SCALE

Top navigation bar height = **88px** · minimum tap target for every button/icon = **44 × 44px** · all corners are **square (0 radius)** except pill buttons which are fully round (999px).

COLOUR SYSTEM

Three core colours carry ~90% of the site. The remaining "scene" colours are **section-locked** — only use them where noted.

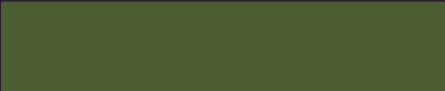

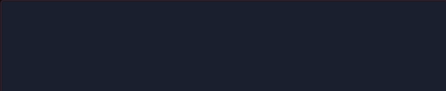

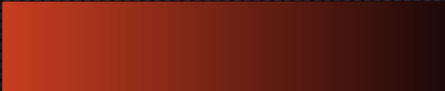

CORE — USE EVERYWHERE

		
Tiger Red #C83D20 Headlines, CTAs, accents, links. "The Commander."	Plum Black (Void) #1C0808 Dominant background, 60%+ of every screen. "The Stage."	Parchment / Cream #F0EBD8 Body text & logo on dark. "The Voice."

SUPPORT & STATES

		
Red Dark #B22D12 Hover state for red buttons only.	Parchment Muted #C8B890 Second-tier text, captions, subtitles.	Dark Border #2A1F2A All borders, dividers, card edges.
		
Tiger Yellow #F5C518 / #FDBE06 About headline, "READ THIS SHIT", Act III accent.	Muted Text #7A6A7A Footer small print / meta only.	Menu Parchment #F0EBE0 Background of the /menu page only (light page).

SCENE COLOURS — SECTION-LOCKED, DO NOT REUSE ELSEWHERE

		
Army Olive #4A5E32 Story-section accents only.	Deep Navy #1A1F2E Events / night scenes only.	Jade Teal #3D7A6E One surprise section only.
		
Amber Wood #C17B3F Photo tint overlay (multiply) only.	Near Black #0A070D Footer bottom bar only.	Photo overlays rgba 0.18 → 0.96 Dark gradient scrims keep text legible on images.

TYPOGRAPHY

Five families. Display is the loud serif; body is a clean sans; the rest are flavour. Japanese is always set in Noto Sans JP (with Dela Gothic for "rough" display).

FONT FAMILIES & WHERE THEY'RE USED

FAMILY	FALLBACK	USED FOR
TAN Nimbus	Fraunces 900	All big display headlines — the neon HEY / TIGER, section H2s.
Jandus RD	DM Sans	Body copy, navigation, labels, buttons, meta — the workhorse.
Barlow Condensed	DM Sans	About-section subhead & body, condensed run-ins.
BEBAS NEUE	Jandus RD	About keywords, offering titles, the booking pill.
Noto Sans JP / Dela Gothic	system JP	Japanese characters everywhere (おいトラ・ ・ ・).

TYPE SCALE — WHAT EACH SIZE IS

TOKEN	SIZE (MIN → MAX)	WHERE
Hero display	clamp(84 → 210px)	The neon HEY / TIGER on the landing hero.
About headline	clamp(88 → 160px)	"HEY, TIGER" yellow headline in About.
Heading XL	clamp(52 → 112px)	Section H2s (Menu, Spaces, Footer reserve).
Menu category H2	clamp(48 → 96px)	Category title on the /menu page.
Story act title	clamp(44 → 88px)	THE CALL / THE CODE / THE FEAST.
JP display	clamp(24 → 44px)	Large Japanese display lines.
Body	13px	Default paragraph & list text.
Label	11px	Buttons, nav, eyebrows, meta.
Micro	10px	Tiny captions, index numbers, tags.

LETTER-SPACING (TRACKING)

Headlines are tight -0.01em . Labels & eyebrows are wide: $0.20\text{em} \rightarrow 0.52\text{em}$. The widest "ultra" tracking 0.44em is the signature look on small uppercase labels. Headlines, CTAs & section titles are **UPPERCASE**.

SPACING & GRID

Consistent padding tokens keep the rhythm. These are the same values reused on every page edge and between blocks.

SPACING TOKENS

SECTION — X	clamp(24px → 72px) Left/right padding on every full section.
SECTION — Y	clamp(48px → 88px) Top/bottom padding on sections.
SECTION Y — LG	clamp(64px → 112px) Larger top/bottom (e.g. Menu header).
CONTENT — Y	clamp(32px → 52px) Gaps between content blocks.
CONTENT MAX-WIDTH	1360px centred (Form, Spaces). Hero text column 1100px.
COPY MEASURE	Paragraphs capped at 40–56 characters per line for readability.

CORNERS & BORDERS

- Everything is **square — 0 radius** (cards, photos, inputs, tags).
- Exception: **pill buttons** are fully round (999px).
- Hairlines / dividers: **1px** in Dark Border #2A1F2A.
- Menu page header underline: **4px** Tiger Red.
- Spaces private-events block: **8px** cream left bar.

MOTION (FOR REFERENCE)

- Fast 160ms · Base 280ms · Slow 600ms.
- Standard ease cubic-bezier(.4,0,.2,1).
- Cinematic ease cubic-bezier(.22,1,.36,1) for reveals.
- Headlines have a subtle **neon flicker**; honour "reduce motion".
- Hero background = slow **90s panorama** pan across 5 photos.

PHOTO TREATMENT (SO NEW PHOTOS MATCH)

Photos are darkened & slightly desaturated so cream/red text sits on top. Typical recipe: **contrast 1.05–1.1 · saturate 0.7–0.9 · brightness 0.55–0.82**, plus a dark gradient scrim at the bottom and (in some sections) an **Amber Wood #C17B3F multiply** tint at ~22–28%. Supply photos bright & punchy — the layout dims them.

LOGO PLACEMENT

Two logo files, three colour treatments, and the eight places they currently appear across the site.

heytiger-logo.png

1032 × 968 px · PNG · transparent

The main Hey Tiger mark. Near-square. Used at the navbar, About panel, menu sections, footer.

△ Also doubles as the **favicon** (32×32) & Apple touch icon (180×180).

PRIMARY

BMH-logo.png

515 × 485 px · PNG · transparent

Brass Monkey Hospitality (parent group). Always paired with / subordinate to the Hey Tiger mark.

THE 3 TREATMENTS

Full colour (original)

White
knockout

brightness(0)
invert(1)

Red tint (footer, on cream)

PLACEMENT MAP — EVERY APPEARANCE

#	LOCATION	POSITION	RENDER HEIGHT	TREATMENT
1	Landing — top nav	Top-left, fixed	58px	Full colour · bar = 88px tall
2	Landing — mobile menu overlay	Top-left	50px	White knockout · 92% (shows <980px)
3	Landing — About panel	Top-right of dark panel	90 → 150px	White knockout · 90%
4	Landing — About panel (BMH)	Bottom-left	36 → 52px	White knockout · 40%
5	Landing — Menu section header	Top-right (BMH + Hey Tiger paired)	64 → 96px ea.	White knockout
6	Landing — Footer	Newsletter column (paired w/ BMH)	70px / 64px	Red tint · 70% · 1px divider between
7	Menu page — header	Top-left	38 → 72px	White knockout · 95% · 4px red underline
8	Availability page — header	—	none	No logo image — text wordmark only

TWO OPPORTUNITIES FOR YOU

① The favicon / app icon is just the full logo squeezed into a square — a **dedicated square app-icon** export would look far sharper. ② The **Availability page header has no logo** (#8) — it uses Japanese text. Adding the mark there is an easy win.

STICKERS, ICONS & BUTTONS

Hand-drawn sticker decals add the "RAAAAAAR" energy. Below: where each lives, the UI icon set, and the button rules.

STICKER / DECAL INVENTORY (PNG, TRANSPARENT)

FILE	NATIVE PX	USED ON	RENDER SIZE	TRANSFORM
sticker1.png	491 × 508	Story · Act I	72 → 110px	top-right · rotate -14°
sticker3.png	500 × 499	Story · Act II	72 → 110px	top-right · rotate +10°
sticker5.png	500 × 499	Story · Act III	72 → 110px	top-left · rotate -7°
sticker2.png	499 × 500	Footer · reserve CTA	160 → 220px	hover rotate -4° · scale 1.07
sticker4.png	573 × 435	Booking band #2	72 → 120px	white knockout
sticker6 · 9 · fot · fot2	—	Spare — currently unused		free to deploy

UI ICONS & WIDGETS

- **Hamburger** — 44×44px button, 3 bars (2px, 6px gap), shows <980px.
- **Close X** — 44×44px, 20px glyph, 1px border.
- **Arrows** ← → — 44×44px square nav buttons (Spaces / Menu).
- **Nav dots** — active 24×6px, inactive 6×6px (Spaces).
- **QR code** — 74px module + 8px quiet zone on cream; encodes heytigerdubai.com/menu.
- **Social** — text links (Instagram, TikTok), no icon glyphs.
- **"EST. 2026"** red chip · **Room counter** chip "ROOM 01 / 5".
- **Scroll progress bar** — thin bar pinned to top edge.

BUTTON SYSTEM

BOOK A TABLE

Primary · red pill · min-height 44px · hover → #B22D12

EXPLORE THE STORY

Secondary · transparent · underlined cream

VIEW FULL MENU →

Tertiary · red square · for menu links

CLAIM THE DEN →

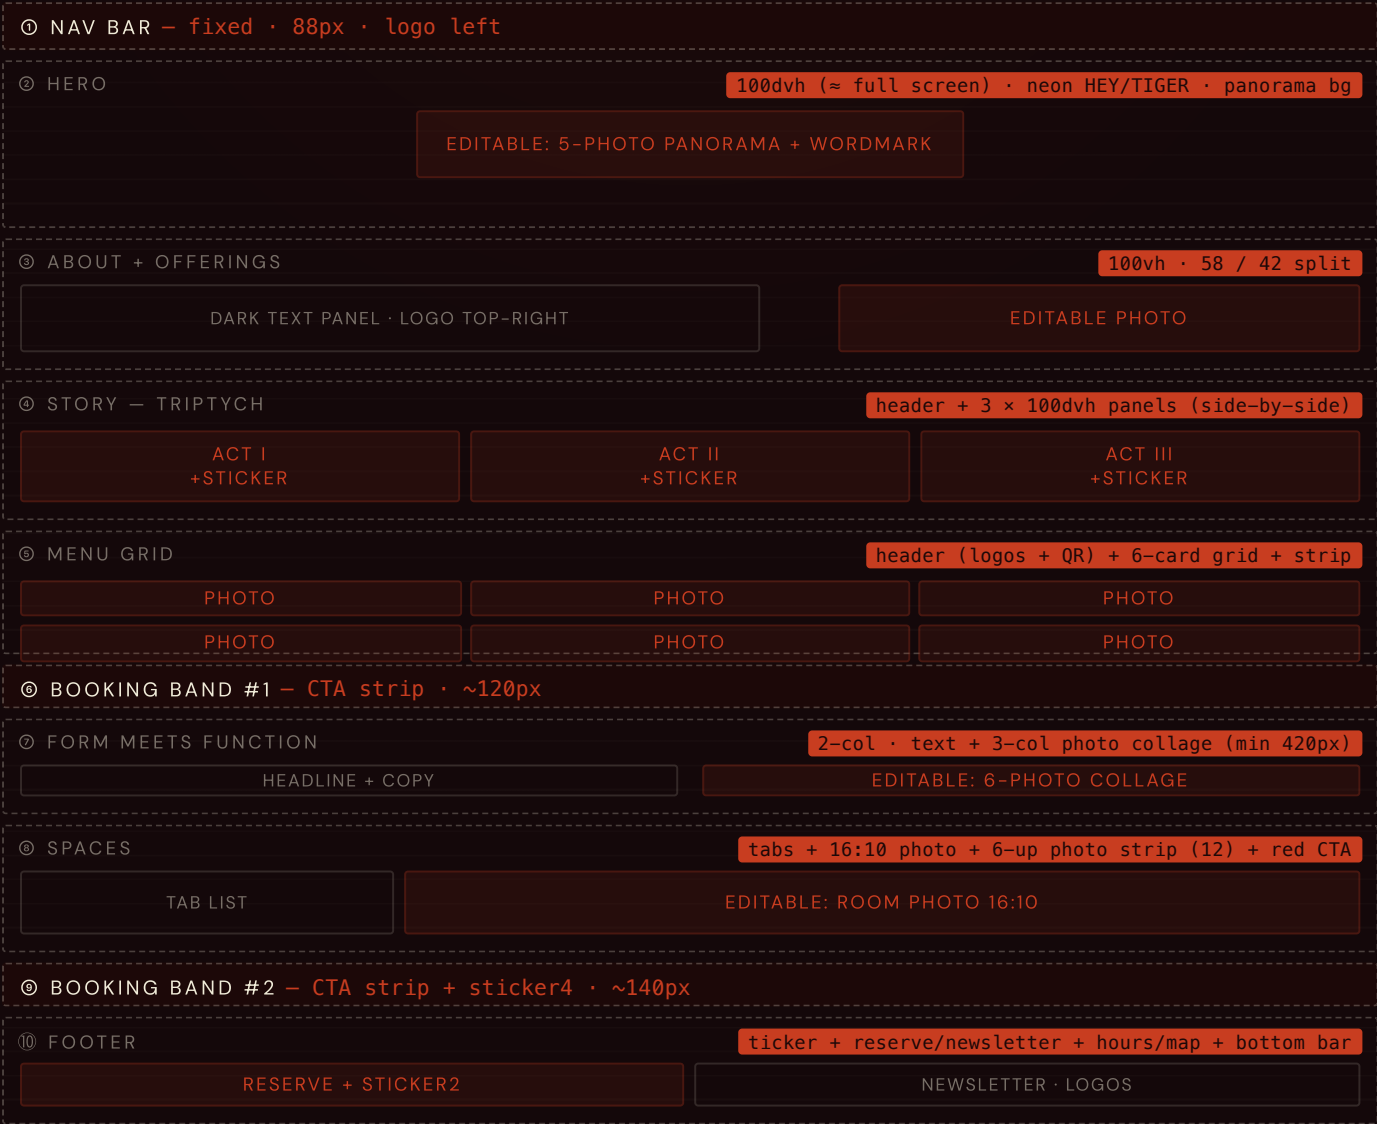

Dark pill on red block (Spaces private events)

ACCESSIBILITY FLOOR

Every tappable thing is at least **44 × 44px**. Keep this when adding icons or buttons. Decorative stickers/icons carry no alt text; meaningful ones do.

LANDING PAGE — THE STACK

The home page (/) is one long vertical scroll of 11 blocks. Heights below are at the **1440px desktop** reference. Detailed diagrams follow on pp.10–14.

FLOATING ELEMENT

⑪ A "Book a table" pill floats fixed at **bottom-centre** (mainly mobile), 24px from the bottom edge, above everything. Don't cover it with artwork.

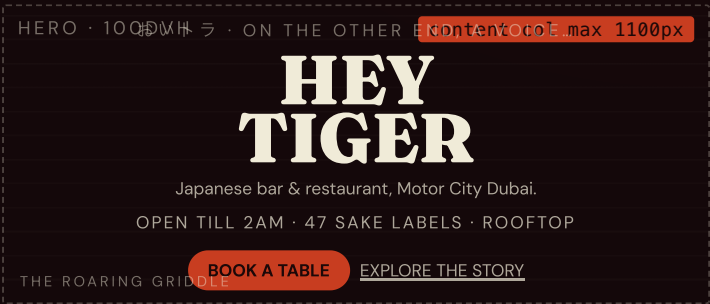

NAV @ HERO

① NAVIGATION BAR — FIXED, ALWAYS ON TOP

- 1 **Logo** top-left, 58px tall, full colour, links to top.
- 2 **Nav links** centre-right, 11px uppercase, 0.30em tracking; active link turns red. Hidden below 980px.
- 3 **Book a table** red pill far-right. Below 980px both links & pill hide → hamburger.

② HERO — FULL-SCREEN, CENTRED

- 1 **Background** = 5-photo panorama, auto-pans 90s, +50% black scrim. **editable** — swap the 5 images.
- 2 **Neon HEY / TIGER** — display font, **clamp(84-210px)**, HEY white + TIGER red, flicker animation.
- 3 **Meta row** — operational facts; **two CTAs** (red pill + underline).
- 4 **Top padding 88px** so content clears the fixed nav. Centred vertically & horizontally.
- 5 Corner caption bottom-left. Keep the centre clear for the wordmark.

EDITABLE IN THIS VIEW

The 5 hero panorama photos · the meta-row facts · CTA labels. The neon wordmark itself is type, not an image.

ABOUT @ STORY

Ⓢ ABOUT + OFFERINGS — 58 / 42 SPLIT, MIN 100VH (STACKS <860PX)

- 1 **Logo** top-right of the dark panel, 90→150px, white knockout 90%.
- 2 **Yellow "HEY, TIGER"** headline 88→160px, then subhead, keyword line, body, and a 2-column **offerings** list (7 items).
- 3 **BMH logo** bottom-left, faint (40%).
- 4 **Right photo** full-bleed with amber tint + dark bottom gradient carrying JP caption. **editable**.

Ⓢ STORY — 3-ACT TRIPTYCH (SIDE-BY-SIDE DESKTOP · STACKS <600PX)

- 1 Three full-height panels, each a **background photo** + heavy dark gradient. **editable photos**.
- 2 Each carries a **sticker** (S1/S3/S5) at a jaunty angle — see p.8. Text sits bottom-left: act #, title, JP, lead, body lines.
- 3 A giant ghost numeral (01/02/03) bleeds off the bottom-right corner at ~9% opacity.
- 4 Section header above: "THE STORY · · MOTOR CITY".

MENU GRID @ BOOKING BANDS

⑥ MENU GRID — HEADER + 6 CATEGORIES (3-COL → 2 → 1)

- 1 Header: H2 "SIX WORLDS / ONE KITCHEN" left; **BMH + Hey Tiger logos** (white, 64→96px) + a **QR** + "VIEW FULL MENU" right.
- 2 **6 category cards**, hairline-divided. Each reveals a **photo on hover** (a spotlight mask). **editable: 6 photos**.
- 3 Giant kanji watermark behind, ~4% opacity.
- 4 **Bottom strip**: facts + a red "VIEW FULL MENU →" square button.

⑥ ⑥ BOOKING BANDS — FULL-WIDTH CTA STRIPS

- 1 Both bands: 1px top + bottom border, plum bg, JP word + display headline + red pill + microcopy. Band #2 adds **sticker4** on the left.

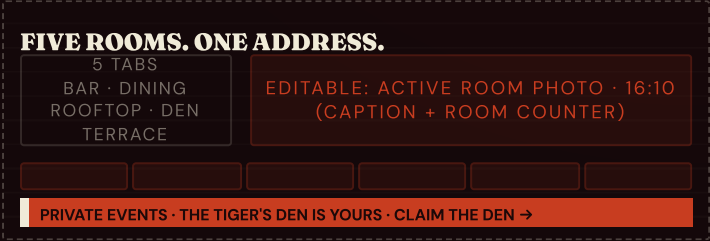

FORM @ SPACES

Ⓢ FORM MEETS FUNCTION — 2-COL (STACKS <900PX) · MAX 1360PX

- 1 Left: stacked display headline 44→104px + body + yellow run-in.
- 2 Right: 6-image collage, 3 columns, 4px gaps, min 420px tall. **editable: 6 photos.**

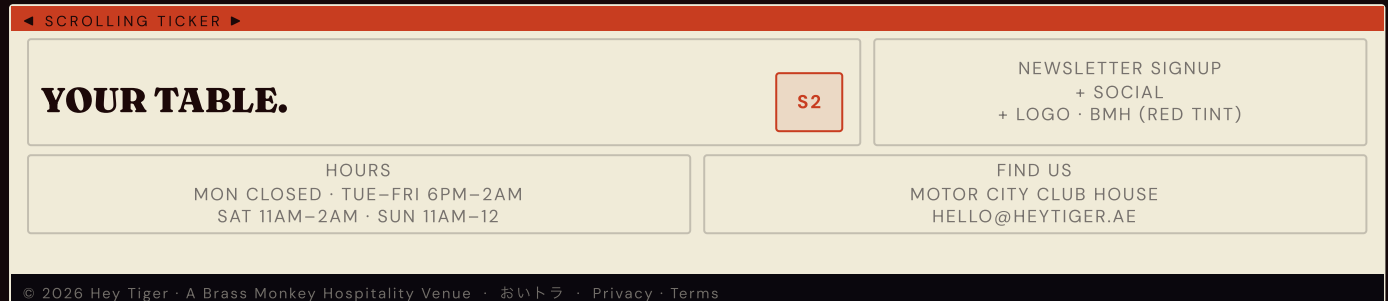

Ⓢ SPACES — TABS + FEATURE PHOTO + 12-PHOTO STRIP + PRIVATE CTA

- 1 Tab list (5 rooms) left; active tab = red w/ white left bar. Feature photo 16:10 right w/ caption + "ROOM 01/5" chip. **editable: 5 room photos.**
- 2 Photo strip: 12 portrait (3:4) thumbs, 6-up → 3 → 2. **editable: 12 photos.**
- 3 Private events red block w/ 8px cream left bar, capacity facts + dark "CLAIM THE DEN" pill.

FOOTER — ON CREAM

The footer flips to a **cream #F0EBD8 background** — the only large light area on the home page. Logos use the **red-tint** treatment here.

- 1 **Red ticker** strip runs along the very top of the footer.
- 2 **Reserve block** (left): big red "RESERVE YOUR TABLE." + **sticker2** (160→220px) as the clickable booking decal.
- 3 **Newsletter** (right): email signup, Instagram/TikTok text links, then **Hey Tiger 70px + BMH 64px** logos in **red tint**, 70%.
- 4 **Hours + Find Us** two-column band below.
- 5 **Bottom bar** on near-black #0A070D: copyright, おいトラ, Privacy / Terms.
- 6 Collapses to a single column below **900px**, centred.

MENU PAGE /menu

A standalone, mostly **light** (parchment #F0EBE0) page: a dark header band, a sticky category bar, then the dish grid. 12 categories total.

- 1 Header band (dark, 64→128px): logo top-left 38→72px + ヘイ、タイガー wordmark + EST. 2026 chip. 4px red underline.
- 2 Sticky category nav — a grid of all 12 categories + "ALL"; active = red. Pins to the top on scroll (top:0).
- 3 Category title 48→96px red, optional hero photo 16:9. editable.
- 4 Dish grid auto-fills cards min 300px wide; each: name, JP, desc, price, dietary tags.
- 5 QR footer band back on dark, encodes the menu URL.

CATEGORIES (12)

Starters · Sushi & Rolls · Dim Sum · Robata & BBQ · Wok & Mains · Rice & Noodles · Sides · Desserts · Cocktails · Sake & Spirits · No Proof.

DIETARY & TAG CHIPS (ALREADY DESIGNED)

Tags: SIGNATURE · CHEF'S FAV · NEW · PLANT · 🌶️ SPICY · 💎 PREMIUM. Dietary keys: V · SP · D · E · G · S · F · N — each has its own colour. Match these if adding new dishes.

AVAILABILITY /availability

A focused, all-dark page (#1C0808) showing opening hours & live open/closed status, with a 5-link sub-nav and a single CTA.

- 1 **Header 72→148px** — currently a Japanese **text wordmark** (ヘイ、タイガー) + 公 + EST chip. **No logo image** — add the mark [here](#).
- 2 **Sub-nav:** 5 equal links (Home · Menu · Spaces · Story · Find Us).
- 3 **Hours table** capped at **680px**: day · JP day · hours, with a live status pill driven by Dubai time.
- 4 Single red pill **CTA** at the bottom.
- 5 Page padding **48→96px** vertical, **24→72px** horizontal.

HOURS (SOURCE OF TRUTH)

Mon CLOSED · Tue–Fri 6PM–2AM · Sat 11AM–2AM · Sun 11AM–Midnight. Keep these consistent with the footer.

WHERE TO DROP ARTWORK

Every red zone in this document is a slot you can fill. Master list below, plus export specs so files drop in clean.

EDITABLE SLOTS — IMAGE COUNTS

LOCATION	SLOTS	SHAPE	NOTES
Hero panorama	5	landscape	Wide, atmospheric; they pan & get a dark scrim.
About — right panel	1	tall full-bleed	Amber tint + bottom caption overlaps.
Story acts	3	full-height	Heavy gradient; text sits bottom-left.
Menu grid cards	6	card	Revealed on hover via spotlight mask.
Form collage	6	portrait-ish	3-col mosaic, tight 4px gaps.
Spaces — feature	5	16:10	One per room tab; caption overlays bottom.
Spaces — strip	12	3:4 portrait	Thumbnail row; name label on each.
Menu page	12+	16:9 + dish	Category hero + per-dish photos.
Stickers / decals	∞	cut-out PNG	4 spares ready (sticker6/9/fot/fot2); add more.

EXPORT SPECS

- Logos & stickers: PNG, transparent, @2–3× the max render size. Also supply SVG if vector exists.
- Photos: JPG, sRGB, quality ~80. Width ≥ 2400px for hero/full-bleed; ≥ 1200px for cards/strip.
- Supply photos **bright** — the site darkens them (see p.6 recipe).
- Favicon / app icon: dedicated square 512×512 master (currently missing).
- OG / social share: 1200×630 (currently herophoto.png).
- Keep **square corners**; only pill buttons are round.

NAMING & HANDOFF

- Photos already live in /public/images/ → header · spaces · story · brand.
- Logos & stickers live at /public/ root.
- Match existing names when swapping (e.g. spaces/rooftop.jpg), or hand me a clearly-labelled folder and I'll wire it up.
- Flag any colour that must print exactly — give me Pantone/CMYK too.

QUICK WINS TO DESIGN

- ☐ Square app/favicon icon · ☐ Logo for the Availability header
- ☐ Fresh sticker set · ☐ Hero panorama refresh.

おいトラ

HEY TIGER — RAAAAAAR CULTURE

Questions on any measurement? Everything here is pulled live from the build — ask and I'll confirm exact values.
